EXPERTISE IN MACHINING

Walter Perform line – the new standard for small and medium batch sizes.

The Walter product lines – Expertise to the power of three.

All Walter tools are characterised by maximum precision and process reliability. You can create real added value by finding a product range which precisely meets all of your requirements. With three product lines in its premium segment, Walter has the solution to match your requirements.

SUPREME

Within the Supreme line, you will find tools with optimised machining qualities. These tools are always the first choice wherever high cutting speeds and long tool life for processing large batch sizes are required. Supreme tools are designed for machining very specific material groups, and often far exceed the performance of comparable tools.

ADVANCE

Are you looking to strike the ideal balance between the most cost-effective production possible and long tool life? The key strengths of the tools in the Advance line really come into play in volume production applications of medium batch size. They offer three key benefits: Modest investment costs, excellent performance data and a wide range of different models.

PERFORM

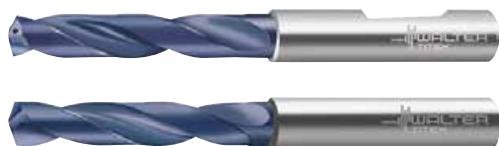

The tools in the Perform line help you to ensure excellent profitability and cover an impressively wide range of applications. They are ideal for use with a wide variety materials, for processing small to medium batch sizes.

Walter Premium quality and cost efficiency.

Users with small and medium batch sizes are rarely looking for a tool to process large quantities – rather, they want a tool that provides flexibility in terms of application as well as cost efficiency. The Perform line from Walter offers you ideal solutions: They can be used for the most diverse types of material, and are designed precisely for achieving high-quality results at a reasonable price.

DRILLING WITH DC150 PERFORM – EVERYTHING UNDER CONTROL, 100% PROCESS RELIABILITY

Users faced with a wide range of workpiece materials and machining conditions have to cope with many challenges – and therefore require tools that offer exceptional flexibility. The new solid carbide drills from the Perform line's DC150 product family are perfectly designed for this: They can be used universally and offer Walter's proven quality – all at a reasonable price.

THREADING WITH TC115/TC216 PERFORM – CUSTOMISED COST EFFICIENCY

When it comes to cost-effective tapping, reliable processes and tools that can be used universally are basic requirements because machining conditions can vary dramatically depending on the material and workpiece. With geometries and coatings that are perfectly suited to the application, TC115 and TC216 taps cope easily with this challenge.

MILLING WITH MC232 PERFORM – UNIVERSAL USE IN ISO P, M AND K

Suitable for any number of varying milling operations, a long tool life and excellent wear resistance, suitable for use in a wide variety of applications and in a broad diameter range: The MC232 Perform offers an economical solution when it comes to milling small and medium batch sizes.

The products from Walter's Perform line.

Walter Titex DC150 Perform – flexible in use and very wear-resistant.

THE APPLICATION

- ISO material groups P, M, K, N, S, H, O
- Can be used with oil and emulsion
- Areas of use: General mechanical engineering, mould and die making, and the energy and automotive industries

THE TOOL

- Solid carbide twist drill
- Grades: WJ30RE and WJ30TA; K30F-TiAIN
- 140° point angle
- Diameter range 3-20 mm

THE DIMENSIONS

- Grade: WJ30RE, K30F, TiAIN:
 - DIN 6537 short $3 \times D_c$ with and without internal cooling
 - DIN 6537 long $5 \times D_c$ with internal cooling
 - Shank in accordance with DIN 6535 HA and HE
- Grade: WJ30TA, K30F, TiAIN:
 - Walter standard $8 \times D_c$ with internal cooling
 - Walter standard $12 \times D_c$ with internal cooling
 - Shank in accordance with DIN 6535 HA

Walter Titex DC150 Perform

BENEFITS FOR YOU

- Cost-efficient machining of small and medium batch sizes
- Universal in its use on all materials
- Shank variants for all adaptors typically used in drilling, such as: Whistle Notch toolholders, hydraulic expansion chucks, collet chucks, shrink-fit chucks and power clamping chucks

Walter Prototyp TC115 / TC216 Perform – ideal for the most diverse of materials.

THE APPLICATION

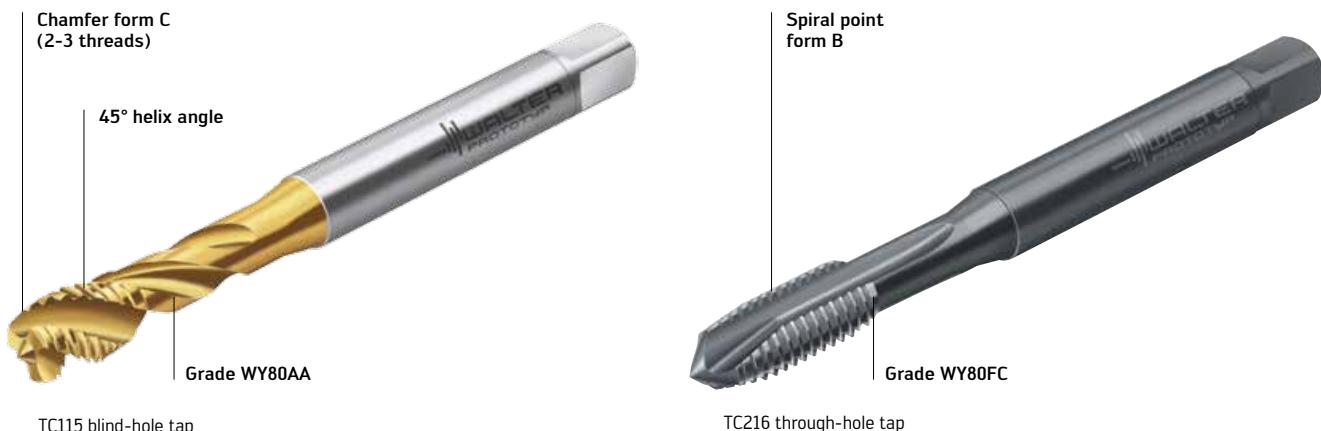

- Blind-hole and through-hole threads
- Dimension ranges:
 - M3-M20
 - MF: M8 x 1-M18 x 1.5
 - UNC: UNC6-UNC% (DIN/ANSI)*
- Primary application:
 - ISO P: 300-1000 N/mm²
 - ISO M: < 800 N/mm²
 - ISO K: GJS (GGG)
 - ISO N: Al wrought alloy,
AISI < 4% silicon**

* Overall length \triangleq DIN
Shank diameter \triangleq ANSI

** Secondary application with TC115

THE TOOL

- HSS-E machine taps
- TC115: For blind holes up to $3 \times D_N$
- TC216: For through holes up to $3.5 \times D_N$
- ISO 2/6H tolerances
- Two variants: TiN-coated or vaporised

Walter Prototyp TC115 / TC216 Perform

BENEFITS FOR YOU

- TiN coating: Long tool life
- Vaporised: Very good chip control; minimises weld formation
- Flexibility through a wide range of applications with a variety of materials
- High process reliability

– SOLID CARBIDE CUTTER

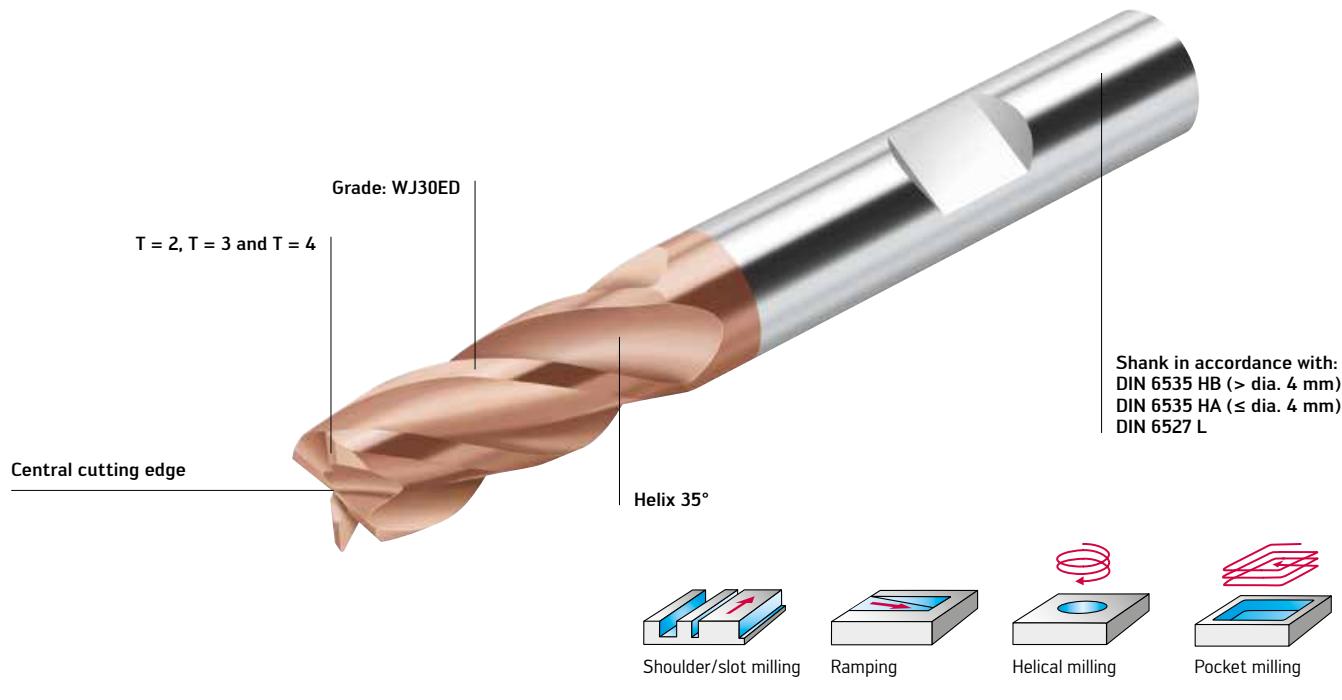

Walter Prototyp MC232 Perform – universal use in ISO P, M and K.

THE APPLICATION

- ISO material groups P, M and K
- Lateral milling, full slotting, pocket milling, helical plunging, ramping
- Areas of use: General mechanical engineering, mould and die making, and the automotive and energy industries

THE TOOLS

- Solid carbide cutters from the Perform line
- Three cutter types; 36 dimensions
- With 2, 3 or 4 cutting edges
- Diameter range 2-20 mm

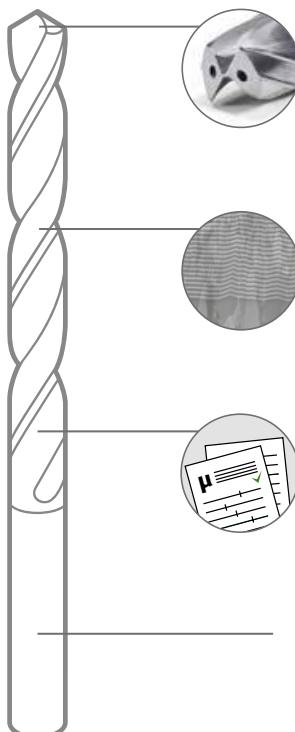

Walter Prototyp MC232 Perform

BENEFITS FOR YOU

- Universal applicability
- Wide range of applications
- High level of cost efficiency for small and medium batch sizes

Reconditioning to the original manufacturer quality really pays off.

The Reconditioning Service from Walter Multiply makes a significant contribution towards lowering your production costs. This service can offer you Walter Titex and Walter Prototyp tools that are as good as new, to the original manufacturer quality and all at an attractive price-performance ratio.

ORIGINAL GEOMETRIES

Cutting edge geometries are extremely complex. During reconditioning, Walter employs its extensive engineering competence to return them to their original condition.

ORIGINAL COATING

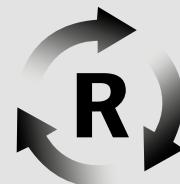

When it comes to tool performance, the coating is key. Only Walter uses the original coating process during reconditioning.

ORIGINAL TOLERANCES

These tolerances and marks of quality are just as important when reconditioning as when Walter manufactures a completely new tool. To achieve this, we only use the most up-to-date measuring equipment.

RECONDITIONING RANGE

- Solid carbide drills and milling cutters
- Solid carbide special boring tools and special milling tools
- High-performance solid carbide reaming tools
- Solid carbide thread milling cutters

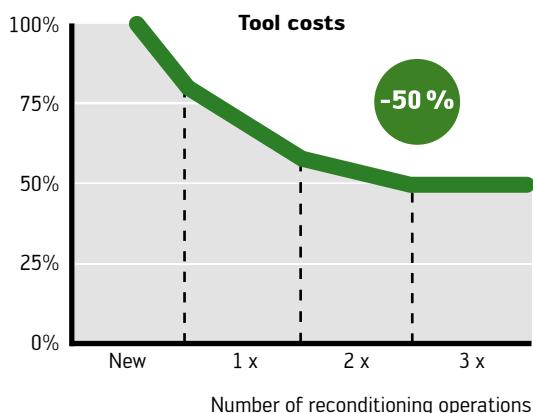

OUR MARK OF 100% QUALITY

Look out for the "Original Walter Quality" label which indicates that a tool has been reconditioned to original manufacturer quality. It even appears in the ordering documents, meaning that you can immediately see for which tools we recommend our Reconditioning Service.

50% LOWER COSTS

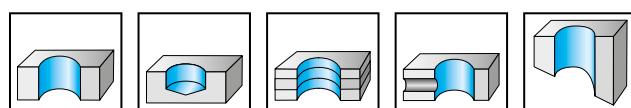

Tools are often disposed of far too early, even though the Walter Reconditioning Service can restore the tool a number of times to original manufacturer quality. You can benefit from reduced costs, reliable production processes and consistent tool life by reconditioning your tools at our Reconditioning Centre, which is available worldwide. It could save you up to 50% on your tool costs!
